As much as i love beetlejuice i cant recommend this game.  
Non of the art matches, choppy audio and a bad mobile port.

- hire an artist to flesh out the whole game and themes
- re record beets audio
- fix the issues with controls
- Ui needs to be re done and made easier to work with pc.
- . Looks great, the upgrades are cool, but it needs a fair bit of work to make it playable.

What needs fixing: Double jumps lag considerably after a few minutes' of play time, Beetle will 'get stuck' on various controls (wil suddenly just run left or right until you fall off of a cliff or are killed by enemies), Beetle freezes from time to time and is unable to punch or jump (unless you hit a different key--can't punch? then jump and your punches will start working again, etc).

Levels are enjoyable and at a good difficulty level when the game is operating properly, and it looks like there are a lot of them!

In its current state (Sept 25, 2017) it is frustrating, but if it was updated to work properly it would be cool.
